I. Personal Statement

As a business-savvy technopreneur focusing on the development of different platforms ranging from small to large scale platforms. More than 15 years of experience in the technology industry, an exceptional tech expert who gives you the value of tech to your startup that you deserve, a seasoned entrepreneur, and a reliable tech lead who gives you exact and correct tech direction. I always established first the dreams that every team member has and put everything into realization to produce an unimaginable product.

As an experienced corporate person, I focus on building teams' confidence in building products with the best practices I know based on my own experience and apply them together with the best practices around.

I can be one of the best assets of any company as I fully dedicate myself to work and I am passionate about delivering technology available to everyone and to anyone.

Beestripe LLC (Zigzag Media)

As a Senior Internal Tools Developer and Business Intelligence Specialist, I had worked around with different technologies for me to accomplished tasks given and also doing some project management tasks withe the Internal Tools Team

Projects:

a. Internal applications

- These applications are used to capture data and aggregate them to meaningful reports and dashboards.
- The websites were written in Code Igniter 2 and 3 and supported by MySQL and Redis databases.

b. 3rd party Analytics platforms

- These services make it easier for our company to integrate our tracking and analytics to different applications, systems, and platforms. They provide easy to use interface and vast integrations to different sources.
- Technologies Used: Segment, Amplitude, ModeAnalytics

c. Data warehouse

- Data warehouse solutions are also being created to cater the ever growing data sources. We need an efficient way of analysing and creating meaningful decisions based on our data. This can help us drive our business' growth.
- Technologies Used: AWS Redshift

d. Marketing automation

- These tools make it easier for our developers to automate email marketing.
- Technologies Used: Mautic, ActiveCampaign, Drip

e. DevOps

- Coordinated with 3rd party services to integrate our monitoring to internal and 3rd party monitoring tools. This helps us understand our underlying systems and architecture.
- Technologies Used: Amazon Web Services (AWS), OpsGenie, New Relic
